

Corporate Social Responsibility Policy

Preamble

Landscape Architecture is an internationally recognised profession with a responsibility to shape and form future communities through the creative combination of art and science. The importance of Landscape Architecture as an agent for positive change has never been greater with the environmental and social challenges facing the planet, independent nations and local communities.

Our principles and values dictate the way we behave as a business. We are committed to doing business ethically and with integrity. We seek to demonstrate good corporate citizenship by not only embracing our obligations but to add value to our clients beyond the requirements of the brief.

Community

Savage Consulting encourages and supports our people to seek opportunities to use their skills to help those who have limited resources. In particular we support local, national and international projects through Rotary International by the hands-on activities of management and staff and through personal and corporate giving.

People

We are committed to diversity in the workplace and a work environment that ensures equal opportunity for all. We encourage different approaches and ideas from different backgrounds and experience to bring fresh thinking to our organisation. We are committed to providing a positive and engaging work environment that will allow us to improve our knowledge base and encourage employee retention.

Customers and Stakeholders

Our business and livelihood depends upon our customers. Every employee contributes to our relationships with our customers and is personally responsible for ensuring that any contact with our customers reflects professionalism, efficiency and honesty. We constantly strive to provide high quality service and products.

Honesty and integrity in communications is regarded as an important element in establishing the Company's reputation as a credible and trustworthy member of the business community.

Associated Policies

This policy is supported by, and should be read in conjunction with, our policies on:

- Workplace Health and Safety;
- Environment; and
- Sustainable Procurement.
